## CP Club 365Days Challenge

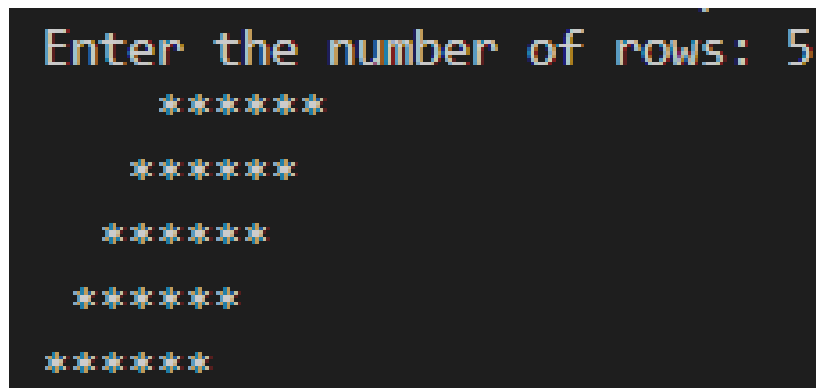

Date – 21/10/2022

Programming language – C++

### Problem Statement

Print the following pattern in the language of your preference.

**Input (Get from the user)**

```

Enter the number of rows: 5
*****
*****
*****
*****
*****

```

**Your Code:**

```

#include <iostream>
using namespace std;

int main()
{
    int n,r,c;
    cout << " Input number of rows: ";
    cin >> n;
    for(r=1;r<=n;r++){
        for(c=1;c<=n-r;c++){
            cout<<" ";

```

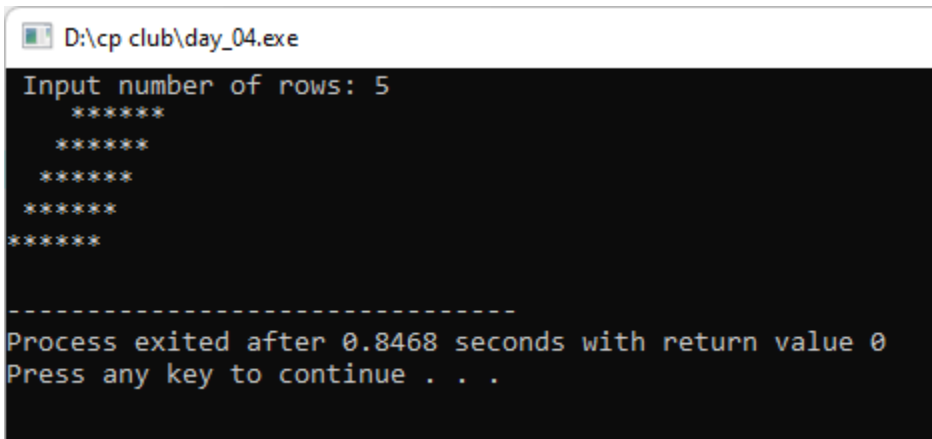

|  |  |                                   |
|--|--|-----------------------------------|
|  <b>Marwadi</b><br>University | <b>Marwadi University</b><br><b>Faculty of Technology</b><br><b>Department of Information and Communication Technology</b> |                                   |
| <b>Sem : 5</b>   | <b>Name : Pushti Depani</b>  |                                   |
| <b>Day : 4</b>   | <b>Date : 21/10/2022</b>   | <b>Enrollment No: 92000133018</b> |

```

    }
    for(c=0; c<=n; c++)
    {
        cout<<"*";
    }
    cout<<"\n";
}
return 0;
}

```

### Output (Screen Shot):

```

D:\cp club\day_04.exe
Input number of rows: 5
*****
*****
*****
*****
*****
-----
Process exited after 0.8468 seconds with return value 0
Press any key to continue . . .

```

### Understanding about problem:

From this experiment I have learned about how to create simple pattern using for and if condition. Moreover

Pattern programs gives the working of looping structures in general purpose programming languages. Its helps user to visualize how every iteration in a loop works.

**Note:** If you can't understand the problem, feel free to contact us and we'll help you. Please don't copy and paste from anywhere.
