CP Club 365Days Challenge

Date – 23/10/2022

Programming language – C++

Problem Statement

Pattern program

Your Code:

```
#include <bits/stdc++.h>
```

```
using namespace std;
```

```
int main()
```

```
{
```

```
    int n,r,c, k = 0;
```

```
    cout << " Input number of rows: ";
```

```
    cin >> n;
```

```
    for (r=1; r<=n; r++)
```

```
    {
```

k = k+r;

```
for (c=k; c>k-r+1; c--)
    cout << c << "*";
    cout << c << endl;
```

```
}
}
```

Output (Screen Shot):

```
D:\cp club\day_06.exe
Input number of rows: 4
1
3*2
6*5*4
10*9*8*7
-----
Process exited after 2.818 seconds with return value 0
Press any key to continue . . .
```

Understanding about problem:

From this experiment I have learned about how to create simple pattern using for and if condition. Moreover Pattern programs gives the working of looping structures in general purpose programming languages. Its helps user to visualize how every iteration in a loop works.
