Problem Statement

<https://www.interviewbit.com/problems/find-duplicate-in-array/>

Your Code:

```
class Solution:
    # @param A : tuple of integers
    # @return an integer
    def repeatedNumber(self, A):

        count = 0
        A.sort()
        for i in range(1,len(A)):
            if A[i]==A[i-1]:
                A[i],A[count]=A[count],A[i]
                count+=1
        return A[:count]
```

Output (Screen Shot):

 Marwadi University	Marwadi University Faculty of Technology Department of Information and Communication Technology	
Sem : 5	Name : Pushti Depani	
Day : 71	Date : 27/12/2022	Enrollment No: 92000133018

Output

Compiling your Code...

> **Success!**

Running Test Cases...

> **TestCase - Trivial Case Correctness Failed**

Runtime Error

Your submission stopped because of a runtime error, ex: division by zero, array index out of bounds, etc. You can try testing your code with custom input and try putting debug state in your code.

Traceback (most recent call last):

File "main.py", line 182, in <module>

print obj.repeatedNumber(A)

File "/tmp/judge/solution.py", line 6, in repeatedNumber
