Problem Statement

https://practice.geeksforgeeks.org/problems/value-equal-to-index-value1330/1?page=3&category[]=Arrays&sortBy=submissions

Your Code:

```
def valueEqualToIndex(self,arr, n):
        # code here
        a=[]
        for i in range(0,n):

     if arr[i] == i + 1 :

        a.append(arr[i])

    return a
```

Output (Screen Shot):

	Marwadi University	
	Marwadi University	
	Faculty of Technology	
	Department of Information and Communication Technology	
Sem : 5	**Name :Pushti Depani**	
Day : 54	**Date : 10/12/2022**	**Enrollment No: 92000133018**

Understanding about problem:
In this program we have to compare the index value to the value. So if in the array there are number which is equal to the number of index then we have to print that number or else none. So we are with the index value of each array.
Note: If you can't understand the problem, feel free to contact us and we'll help you. Please don't copy and paste from anywhere.
